

Bugs

Bug id : 001

Title: [🐛 FE] : The rating icon is not clickable

Pre-requisite: NA

Test data : NA

Steps to reproduce:

1. Navigate to <http://localhost:3000/add-book>
2. Scroll down to Ratings Sections
3. Click on the upward and downward incrementer arrows

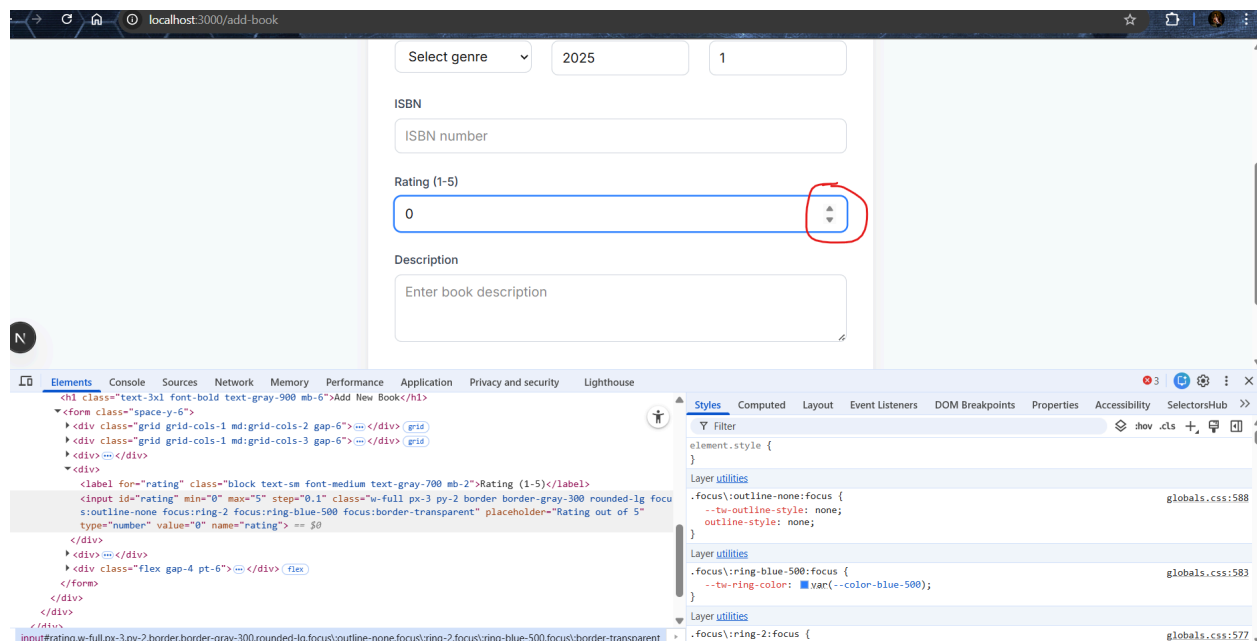

Actual result: On clicking the upward and downward arrows are not working as expected

Expected result: The rating should increase or decrease based on the counter clicked

Severity: Medium

Priority: High

Screenshot:

Root cause: `[name]: name === 'publishedYear' || name === 'pages' || name === 'rating'`
 `? parseInt(value) || 0`
 `: value`

`rating` has `step="0.1"` → the browser tries to set values like `0.1`, `0.2`, `0.3`, etc.

- But you are doing `parseInt(value)` for `rating`.

So:

- User clicks up → browser sets `"0.1"`
- React handler runs → `parseInt("0.1")` → `0`
- State becomes `0` again → input re-renders as `0`
 It *looks* like the arrows don't work because all the decimal steps get rounded down to the same integer.

Fix: Use `parseFloat`, for `rating`

`const handleInputChange = (`

```
  e: React.ChangeEvent<HTMLInputElement | HTMLTextAreaElement | HTMLSelectElement>
) => {
  const { name, value } = e.target;
```

```
  setFormData(prev => ({
    ...prev,
    [name]:
      name === 'publishedYear' || name === 'pages'
      ? (value === "" ? 0 : parseInt(value, 10))
      : name === 'rating'
      ? (value === "" ? 0 : parseFloat(value)) // allow decimals
      : value,
  }));
};
`
```

Title : [🐛 FE] - User is not able to add ratings in decimal [Duplicate bug] links to Bug 001

Pre-requisite:

Test data : 4.2 Rating in Rating section

Steps to reproduce:

1. Navigate to <http://localhost:3000/add-book>
2. Scroll down to Ratings Sections
3. Enter 4.2 as rating in Rating sections

Actual result: Ratings in decimal is not getting saved

Expected result : Ratings should be saved in decimal as well.

RCA and Fix: Same as Bug 001

1. Add a character limit on the input of the checkbox
2. If the limit is large, put the border or display the text with ... format (Like only first 10-20 chars then ... For eg : Aniket Mahendra ...) on the UI

Bug id : 004

Title : [🐞 BE] - Pages values are accepted in decimal as well

Pre-requisite: The local server should be up and running

Test data :

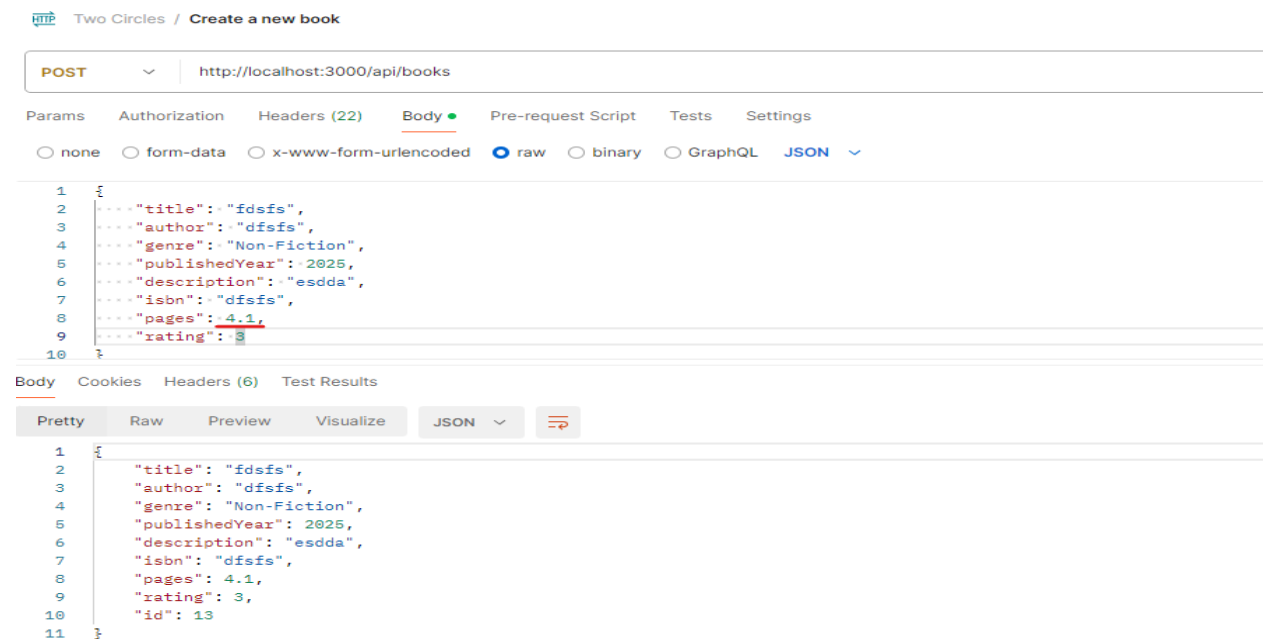

Steps to reproduce: Hit the api, with page value in decimals.

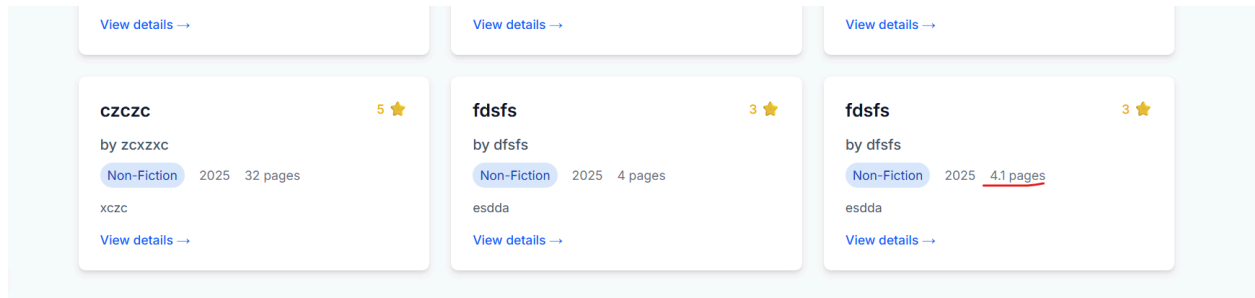

```
curl --location 'http://localhost:3000/api/books' \  
--header 'Content-Type: application/json' \  
--data '{  
  "title": "fdsfs",  
  "author": "dfsfs",  
  "genre": "Non-Fiction",  
  "publishedYear": 2025,  
  "description": "esdda",  
  "isbn": "dfsfs",  
  "pages": 4.1,  
  "rating": 3  
}'
```

Actual result: 201 created. Record is created with 4.1 pages

Expected result: 400 Bad request error should be thrown from the server as 4.1 is not valid pages.

Screenshot:

Fix:

```
const pages =  
  body.pages !== undefined  
    ? Number(body.pages)  
    : 0;
```

Add a validation check for pages in the code.

Title: [🐛 FE] - The input element shows min =0 and max = 5, but as rating it should be 1-5

Pre-requisite: Navigate to Add to Book page

Test data :

Steps to reproduce: NA

Severity : Minor

Priority : Medium

Actual result: Mismatch between the input and label field

Expected result : Both the input and label field should be in sync

Fix: Change the value of <input

type="number"

min="0" -> "1"

max="5"

step="0.1"

In code

Bug id : 006

Title : [🐛FE] When the numeric fields like pages and ratings values are cleared it resets to 0

Test data: NA

Steps to reproduce:

1. Navigate to the add books page
2. Try to clear the rating and page initial 0

Actual result: User is not able to clear the 0

Expected result: User should be able to clear the 1, as he cant know if 0 is the default value.

Severity : Low

Priority : Medium

Bug id: 007

Title: [🐛BE] : User is able to enter negative, out of range (>5) values, character values in the rating section of the api

Test data :

```
curl --location 'http://localhost:3000/api/books' \  
--header 'Content-Type: application/json' \  
--data '{  
  "title": "fdsfs",  
  "author": "dfsfs",  
  "genre": "Non-Fictions",  
  "publishedYear": 2025,  
  "description": "esdda",  
  "isbn": "dfsfs",  
  "pages": 4,  
  "rating": -1  
'
```

Steps to reproduce : Hit the api with rating value

Rating : -1

Rating : "test"

Rating : "10"

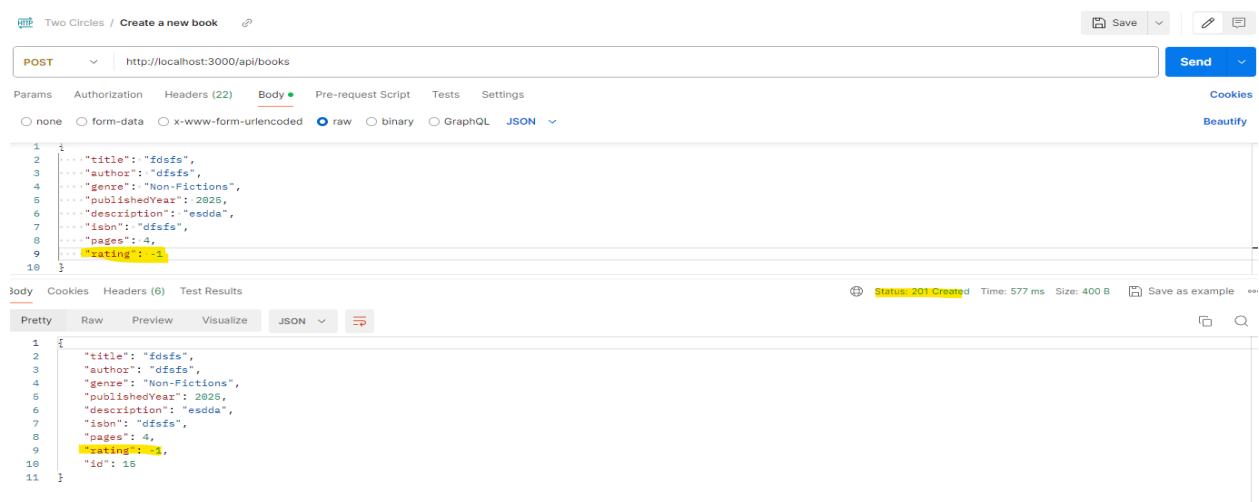

Severity : High

Priority : High

Actual result: The record is getting created:

Expected result: The record should not be created, we should get a error message and 400 bad request status code

Screenshot:

Bug:008

Title: [🐛 FE] : 2 GET book by id and 2 GET requests are made by the front end

Steps to reproduce:

1. Open the network logs and put filter for books
2. Navigate to any existing books
3. Check the console : 2 calls are made
4. Now click back to library button
5. Again 2 calls are made to fetch all the books

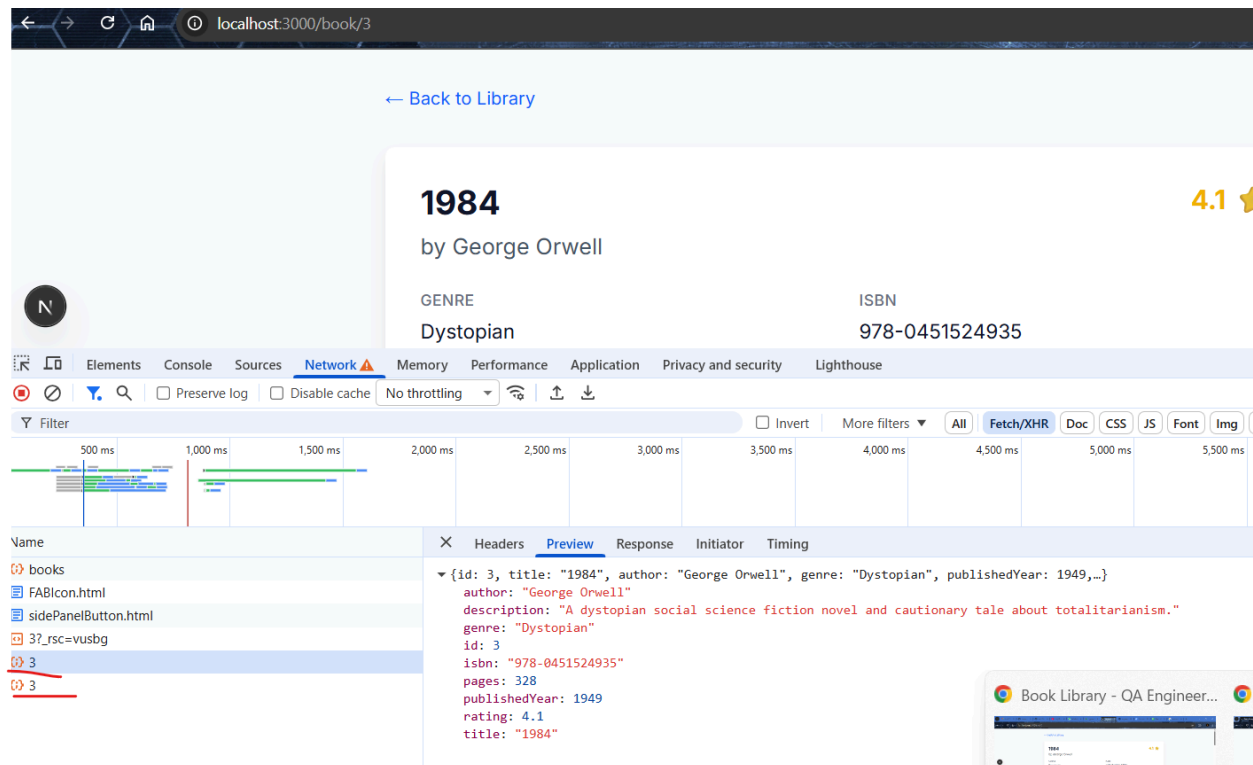

Priority : High (Increase the response time)

Severity : Medium

Actual result : Two get calls are made for fetching the books

Expected result: Only one call should be made to fetch the books by id

Title : [🐞] BE: No Validation on Genre in the api request

Test data:

```
curl --location 'http://localhost:3000/api/books' \  
--header 'Content-Type: application/json' \  
--data '{  
  "title": "fdsfs",  
  "author": "dfsfs",  
  "genre": "Non-Fictions",  
  "publishedYear": 2025,  
  "description": "esdda",  
  "isbn": "dfsfs",  
  "pages": 4,  
  "rating": -1  
'
```

Steps to reproduce

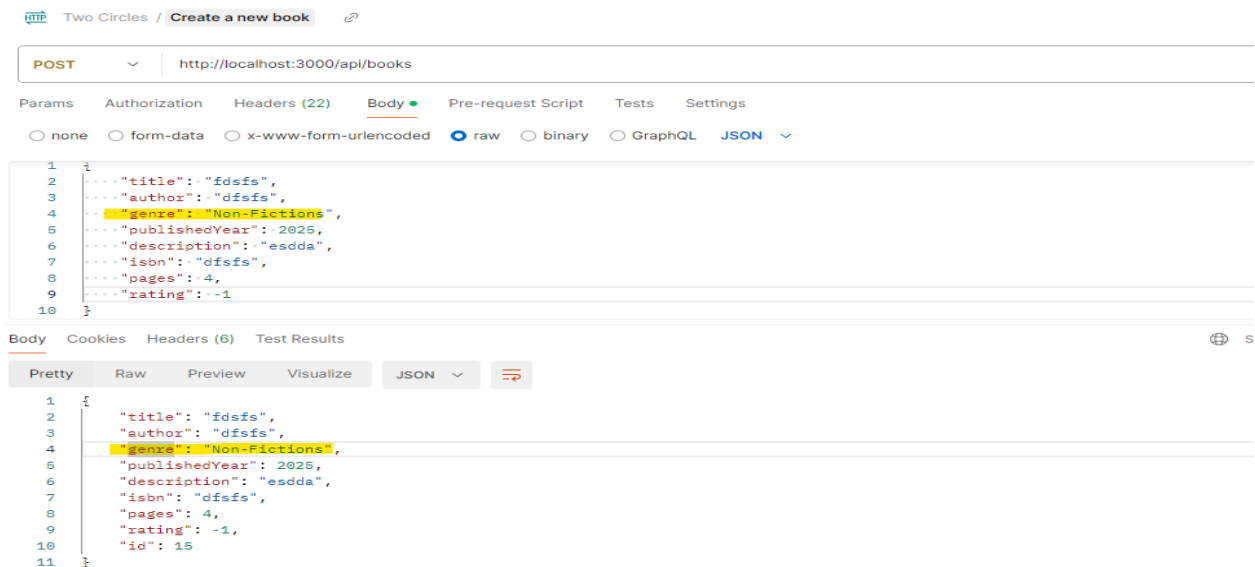

1. Hit the endpoint with non existing genre : test, random etc

Priority : Medium Severity : Medium

Expected result: 400 Bad request should be returned as there is no option for Non-Fictions

Actual result: Record is created with 201

Screenshot

Fix: Add validation in backend for the same
